- 2x Gold Mount and 2x V-Mount battery brackets with mounting plates
- 2x Kit Stand Pro
- Rugged, waterproof hard case with telescopic handle and in-line wheels
- Custom foam insert securely holds the complete kit

PRODUCT DESCRIPTION

This compact 2-light kit provides the essentials for location shoots in a rugged, waterproof Pelican case that's ready for the road. It includes two Astra IP Half fixtures, each with a light stand and battery brackets for Gold Mount and V-Mount batteries. The complete kit including cables weighs in at 50.2lb/22.8kg.

Offering accurate, punchy Bi-Color white light, Astra IP is tough and water-resistant with fast set up for high-performance broadcast lighting in demanding environments. Weighing in at just 6.2lb/2.8kg, the lightweight Astra IP Half is perfect for small spaces and low ceilings. The most compact in the range, it boasts a powerful 1,500 lux output at 10ft/3m, delivering weatherproof reliable performance and exceptional brightness, rain, or shine.

Featuring four sections and three risers with air cushioning to prevent sudden drops caused by accidental retraction, the included light stands have a maximum height of 83in (211cm) and fold down to a compact 26in (67cm).

Run your lights off-grid with Anton/Bauer brackets for Gold Mount or V-Mount batteries (both options included). The brackets attach to the back of the Astra IP fixtures with the included mounting plate, keeping the setup neat and ready to be handheld.

The tough, air- and water-tight Pelican case features double-layered, soft-grip handles in addition to a retractable telescoping handle and rugged in-line wheels. Its custom-designed cut foam interior keeps the kit secure for storage and transport.

Built for the toughest assignments, Astra IP Traveler Kits are a complete solution for news crews and freelancers on the go.
