Studio X5 Bi-Color 200W (Pole Operated, UK Power Cable)

SKU: 960-5213

Fresnel 250mm / 10" Ø

PRODUCT DESCRIPTION

Talent Light with Natural Quality

Litepanels Studio X LED Fresnels, engineered by world renowned broadcast lighting professionals Quartzcolor, deliver high-performance, directional, bright white light with precision spot to flood beam control and consistent quality.

Natural talent light with perfect skin tone rendering is achieved with high output Bi-Color COB LEDs to produce superior white light. With no variation in quality at any dimming level from 0-100% or across the adjustable CCT range from 2700°K to 6500°K, Studio X Fresnels perfectly match ambient and practical set lighting to show talent in a naturally realistic light.

With high-quality, single source wrap-around illumination, Studio X is the perfect choice to light your talent – naturally.
